

New for 2020

# Urban Landscape

**Furlong Flooring**

First choice flooring for every room

## Rustic, low maintenance, engineered wood

We're delighted to launch Urban Landscape: a new addition to our popular engineered wood flooring collection. The range has been developed to meet the needs of customers looking for a natural floor with an authentic, aged appearance. Hand finishing techniques have been beautifully employed to bring out the beauty and texture of the rustic French oak, and traditional stains bring sophisticated style.

The new French oak range, with open knots and river cracks, is finished with a hardwax oil to give an on-trend, distressed and antique look, while also delivering low-maintenance benefits.

Available in 7 on-trend decors, Urban Landscape is also suitable to be used with underfloor heating. Featuring tongue and groove installation, the range can be floated or fully stuck.

### Finished with hardwax oil for easy maintenance

Urban Landscape is finished with a hardwax oil, giving a warm appearance while maintaining the natural look of the wood. The hardwax oil finish forms a strong barrier on the top of the wood, helping to protect against stains and damage from water, heat, dirt and general wear and tear. That makes Urban Landscape the practical flooring choice for highly trafficked areas including hallways, kitchens and living rooms.

The great thing about hardwax oil finished floors is that they are easily maintained and looked after, and when the time comes, a new layer of hardwax oil can be easily applied to get the floor looking as good as new.
